

Product Information

Product Model	JR-C
Product Type	Floor-Wall (Roof-Corner) Expansion Joint Cover/Seismic Profile
Material	Aluminum Alloy 6063 T6
Finish	Mill finish

Introducing our JR-C Floor-Wall (Roof-Corner) Seismic Profile, tailored for applications on concrete upstands in non-walkable areas. This profile excels in establishing a sturdy and water-tight connection among structural components, emphasizing high movement capacity and extended lifespan. Designed for unparalleled performance during seismic events, it integrates seamlessly with aluminum flashing, featuring a multi-rubber gasket system for enhanced structural robustness and a water-tight seal—providing dual protection for your project.

Features and Benefits

Seismic Movement Capability

Designed to accommodate horizontal and vertical movements caused by seismic activity.

Water Tight Design

Specially designed for water-tight connections, preventing water infiltration for enhanced durability.

Aluminum Flashing Compatibility

Structurally designed to seamlessly accept aluminum flashing, providing additional weather protection.

Durable Construction

Made from high-strength aluminum alloy for exceptional durability and long service life.

Multi Rubber Gasket

Equipped with a multi-rubber gasket system to ensure a smooth and water-tight connection between profile parts.

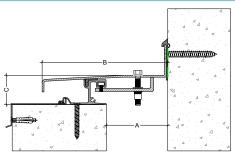

Easy Installation

Quick and hassle-free installation process with clear instructions provided.

Maintenance

- > Regularly inspect the expansion joint cover for signs of damage or wear.
- > Clean with mild soap and water as needed to maintain appearance.

Length	Standard length: 3 meters.
Fire Rating	ASTM E84 Class A.
Installation	Please follow the installation instructions provided in the J-CAP installation guide.
Note	The use of the turn bars is not applicable for gaps up to 75mm
